

# LCT 20

## LIST Cable Tester

The LIST Cable Tester LCT 20 is a portable equipment for measuring of SEC 20 sensor cable.

The LCT 20 has a slim aluminium case and integrated batteries. A special carrying strap will be supplied additionally.

For using LCT 20, it has to be connected to a laptop with the measuring software LISTtest via USB interface.

LED's on the front show the status of the unit.

Due to the integrated batteries it is possible to measure the sensor cable before and during the mounting on the construction site. Therefore all sensors can be tested including the temperature values of all active sensors.

All data will be saved on the connected PC.

These data can also be used for error search and fault clearing.

### Technical data:

Signal:	4 x LED for status display
Connections:	Sensor Cable (via Connection Cable) USB (PC communication)
Working temperature:	- 10°C to + 60 °C
Power supply:	15V, 1200 mA
Battery:	Special NiMH Batteries
Operating time:	ca. 18 h with batteries
Case material:	aluminium
Dimensions:	205 x 36 x 168 mm (L x B x H)
Weight:	0,97 kg
System requirements:	min. Win XP with ServicePack 3 and DotNet Ver. 2.0

### Scope of delivery LCT 20:

LCT 20 USB-connection cable	Z00372
Connection cable VK SEC-S4-KL-03	M00239
Connection Module CCM 3000	M00334
LCT Power Supply	Z00373
Operating manual	60T183
