MA4420B: Multiple Use Manual Actuator

The multiple use manual actuator Model MA4420B allows manual actuation of the Flex pneumatic device. Additionally, a Discharge Pressure Switch can be utilized to send an electrical signal to indicate discharge or to perform equipment shut down.

MA4420: End of Line Manual Actuator with Pressure Gauge

The end of line manual actuator with pressure gauge Model MA4420 is installed at the end of the pneumatic line of the hood. It is used when the cylinder is placed outside of the kitchen. This device allows pressurization of the pneumatic detection line (tubing).
